Education

We participated in the Springvale Farm Walk by cooking and serving a locally sourced breakfast to over 90 people. We also hosted our 4th annual kite day at Goat Hill & Romac Orchards. It was a spectacular and well-attended event!

We also collaborated with the Acton Wakefield Watersheds Alliance and took a group of Wakefield, NH students to the top of Goat Hill to learn about watersheds.

We taught Lebanon summer campers and Alfred Elementary School students about bird beak adaptations, and led them on nature scavenger hunts - our first year working with the Alfred school and 4th year with the Lebanon Summer Camp!

We continued working towards ADA compliance on the new Goat Hill Trail and closed on the Hansen Pond* property in Acton. Fundraising continues for both these important projects - please consider making a contribution!

Conservation

We purchased Walnut Hill IV* in Alfred, from Arvid and Fred Roberts. This 93-acre parcel is a treasure of vernal pools and forested wetlands in the ecologically important Walnut Hill Focus Area.

We celebrated Great Maine Outdoor Weekend in February by learning about animal tracking, and again in September with our first annual Happy Apple Trail Ride at McDougal Orchards.

Connection to Land

We participated in the Springvale Farm Walk by cooking and serving a locally sourced breakfast to over 90 people. We also hosted our 4th annual kite day at Goat Hill & Romac Orchards. It was a spectacular and well-attended event!

*The purchase of Hansen Pond and Walnut Hill IV was made possible with funding from the Maine Natural Resources Conservation Fund*
